Introduction

Software Testing is a field where an application is tested with the intention of finding an errors to ensure quality of software by checking expected result with an actual result.

So this Project aims to perform Automation Testing on Educational website – Matoshri Polytechnic, Nashik in order to assure quality of web application

In this project we have performed functional and non -functional testing on various components of website using Selenium Webdriver – an Automation framework by writing scripts in order to test an application.

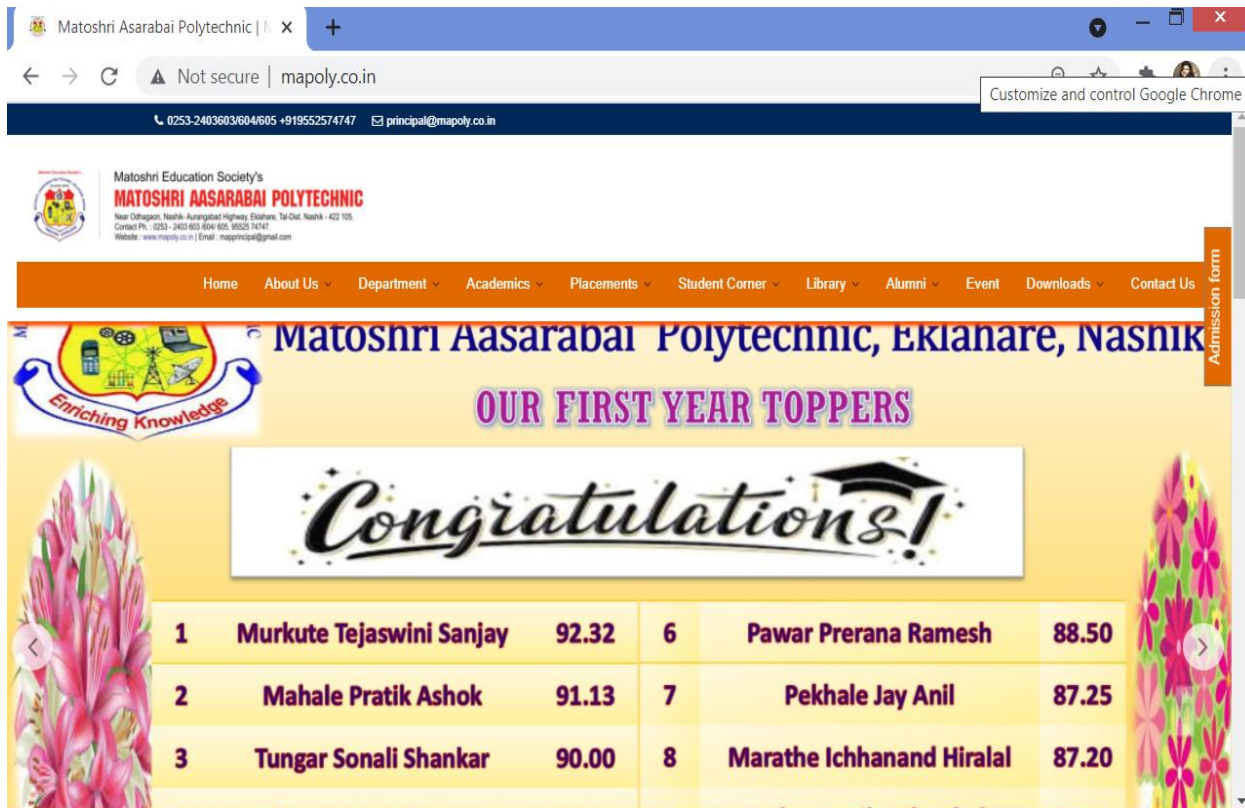

In this project we have executed scripts –

- To get current title, current url
- To maximize Window
- To perform operation on Mouse Hover
- To perform operation of mouse click
- To scroll down page
- To perform drop down operation
- To Fill and send information to web page
- To count total no. of specific components on specific web pages

Software Configuration:

Operating system	:	Windows 8.1 Pro (64 bit)
Browser	:	Google chrome
Chrome Version	:	91.0.4472.124
IDE	:	Eclipse IDE 8.1
Automation Framework	:	Selenium Webdriver
Programming Language	:	Java

TC_01 : Launch the browser and redirect to Matoshri Polytechnic Website

Script:

```
